An appendix gives selected editorial utterances on the occasion, correspondence between England and America, extracts from a pamphlet on this anniversary, the order of service for use on the Sabbath before Thansgiving Day, 1906, and the names of the committees in charge of the general celebration. It was a noteworthy celebration, and it has been fitly recorded

### A STORY OF CANADA

Hearts and Creeds. By Anna Chopin Ray, author of By the Good Sainte Anne, Teddy, Her Book, Nathalie's Charm, Sidney etc. Illustrated from Drawings by Alice Barber Stephens. Published by Little, Brown, and Com-pany, Boston.

The differences and cruel antagonisms made by opposing creeds afford themes as old as literature. And the difference between a Protestant wife who in her tender youth married a Catholic, promising all that the "mixed marriage" ceremonies require, is the central theme of lovel. The husband, Amedee Leleu, besides being a Catholic, is of a French family; the wife, Arline Lord, is English. and at heart flercely opposed to Catholicism. But at the first she tries to enter into her husband's life and aims, enter tains his friends, and so opens for him a political career. One of these friends of Lelen, named St. Just, is also a special admirer of the wife, and while paying her compromising attentions, worms out of her things that put her husband in exceedingly bad light, politically, Finally St. Just springs in his paper a scandalous insinuation, which gets him beating from Leleu, who thereupon makes up with Arline. Then their girl is born, and Arline plots to have her baptized by the Protestant dean before the baptism in the Catholic church; then she teaches the child that it is wrong to pray shocked him so much that he at one bundled the child off to a convent, and publishers, New York. left his wife, with the word that until she is penitent she need not seek him. It is a story of strong passions and intense feeling, and the author presents in it a view of the heavy friction that in Eastern Canada attends the contact of hostile races and contending creeds. And it is good, strong writing,

### A GREAT OLD SAILOR.

Uncle William: The Man Who Was Shiftless, By Jennette Lee, The Cen-tury Co., publishers, New York.

Uncle William is a character study of a type. He is located on an island off the oast of Nova Scotia, where the color of the sea and the sky induced a young painter to spend the summer working and idling at his art. The house where Uncle William lived was a hut, but he owned all the land in sight, nearly all the Island; e needed it for breathing room. He was huge of body and mighty of soul, and he taught that young painter many things. among them some color secrets that helped make the pictures "not so bad as some." An old neighbor of Uncle William was mean and close-fisted, but after all did what his great-hearted neighbor wanted him to do. The trip that Uncle William made to New York when he heard that his painter friend was sick and needed him, the care he took of the and of the marriage of invalid, the visits he paid to the painter's Terk, who had for long betrothed, are all most delightfully told; and the outcome of it all, how good it ings come, in which is! The story is a charming one throughtrated with severe por- out, and deserves to be among the mod-

oncerning Paul and Flammetto. By L. Allen Harker With Introduction by Kate Douglas Wiggin Published by Charles Scribner's Sons, New York. A favorable introduction, by so compe-

tent a judge as writes it, must predispose all to take an interest in this book. As she says, it is English to the marrow as English as a hedgerose or a bit of pink hawthorne;" yet the nature of children is much the same everywhere, and no one could fail to enjoy this quiet story of the ways and the doings of the children of an English country gentleman, and a visitor who was in their companionship The scenes are all moderately drawn, and in comparison with imaginings of a more vivid style, might be called commonplac or dull; but the quiet charm of it all is most enticing and grateful. The young Finnmetta is a brilliant child compared with her more staid English companions but they rise to the occasions presented, with a reckless abandon from care that is very fetching. Paul is a frank and determined young chap, of a reading turn. Janey, who tells the narrative, is a darling. The witchery of the tale grows or one as it is read.

### LITERARY NOTES.

The advance sales of Mr. Owen Wister's new novel, "Lady Baltimore," are so large that the Mzemilian company has put the book to press for a first edition of a hundred thousand

The followers of G. Lowes Dickins: It, author of "Letters from a Chinese Official." "A Modern Symposium," etc. will be glad to know that his publishers, McClure Phillips, are to bring out early this spring a new volume from his pen under the title of "The Menning of Good." It is a resord of an imaginary conversation in which a group of typical young men of our time attempt to establish a definition of "goodness."

Arthur Stringer has taken a new and unhackneyed theme for his new novel. 'The Wire
Tappers,' which Little, Brown & Co. will
publish in April. The hero, an electrical inventor, and the heroine, a beautiful English
girl, by alseer force of circumstances become
associated with a man who attempts by wire
tapping to beat the poolroom. The events
which follows are vividity unfolded by Mr.
Stringer, who is one of the most careful craftsmen among American authors.

"If Youth But Knew" is the title chosen by Mr. Egerton Castle for his forthcoming novel, which the Macmillan company will lissue April 2. Its scene is laid among the Thuringtan mountains, in that patch-work kingdom which Napolesn, in the heyday of his power, carried out of old German soil, and gave, under the name of Royaume de Westphalle, to his inept. bertiers, Farme.

brother Jerome.

E. F. Benson's new novel, 'The Angel of Pain,' bills fair to exceed in popularity any of his former successes, as his publishers, the J. B. Lippincott company, have gone to press with a second edition within two weeks after publication of the novel.

Mr. Benson deserves commendation for departing from the beaten path, and giving us something new and unhackneyed. Marie Correlli herself could not have invented a more wenderful character than Tom Merivale, thermit, whose one great desire was to avoid pain, but which finally comes to him in a most dramatic form.

Announcement is made from New York of the merging of the publishing houses of Herbert S. Store & Co. Chicago, and Fox. Duffield & Co. of New York. The New York firm has curchased the entire good will, assets, plates, sheets and publishing plant of the Stone rompany whose publications will honoforward be catalogued in the Fox-Duffield list. "The House Resultin!" edited by Herbert S. Stone, will be directed as heretofore in Chicago.

cago.

The combination places Fox, Doffield & Co.

In the front rank of the younger houses, with a large proportion of stundard and successful works.

The success of Mr. Samuel M. Gardenbire, the New York lawyer who, in "The Long Arm" (Flarjer's), has succeeded for the third time in pleasing the reading public, serves to call to mind the close connection that has always existed between literature and the law. Many of the navelists whose fame is destined to be lasting had a legal training. Scott was a barrierer, Balzac began his career in a law office. Thackeray was admitted to the bar; Irickens was for a time in a solicitor's office, while among contemporary American literary lawyers are Robert Crant, Frederick Trovo Hill, Charles Major and others. There has never been a time in fact, when there have not been good lawyers writing good novels.

Elecution, eratory, dramatic art, physical culture, fancy dancing. Mr. and Mrs. John Milton, room 250 Commercial Club building.

CALDER'S STATION, March 21.—In an incandescent electric light is the power of illumination governed by the length or size of the wire or fiber inside of the globe, or is it governed by the size of the feed wire leading to the lamp?

The light produced depends upon the amount of electricity consumed and this is governed by the size of the carbon filiament in the lamp, both in cross section and in length. The greater the amount of carbon, the greater is the lighting capacity of the lamp. The carrying capacity of the feed wire is regulated by its size. For economy certain proportions between the amount of carbon and the size of the feed wire are observed.
